Journal of Music Therapy, XXVI (4), 1989, 226–227
© 1989 by the National Association for Music Therapy, Inc.

Index to Volume XXVI (1989)

The number in the parentheses indicates the issue in which the article will be found; the final number indicates the page.

Braswell, C., Decuir, A., & Jacobs, K. Job satisfaction among music therapists; *26*(1), 2.

Burleson, S. J., Center, D. B., & Reeves, H. The effect of background music on task performance in psychotic children; *26*(4), 198.

Camp. C. J. See Pignatiello, M.

Center, D. B. See Burleson, S. J.

Darrow, A. A., & Goll, H. The effect of vibrotactile stimuli via the SOMATRON® on the identification of rhythmic concepts by hearing impaired children; *26*(3), 115.

Darrow, A. A. See Madsen, C. K.

Davis, W. B., & Thaut, M. H. The influence of preferred relaxing music on measures of state anxiety, relaxation, and physiological responses; *26*(4), 168.

Decuir, A. See Braswell, C.

Eidson, C. E., Jr. The effect of behavioral music therapy on the generalization of interpersonal skills from sessions to the classroom by emotionally handicapped middle school students; *26*(4), 206.

Elder, S. T. See Pignatiello, M.

Goll, H. See Darrow, A. A.

Hadsell, N. A. Multivariate analyses of musicians' and nonmusicians' ratings of pre-categorized stimulative and sedative music; *26*(3), 106.

Hunter, L. L. Computer-assisted assessment of melodic and rhythmic discrimination skills; *26*(2), 79.

Jacobs, K. See Braswell, C.

Krout, R. Microcomputer use in college music therapy programs; *26*(2), 88.

Madsen, C. K., & Darrow, A. A. The relationship between music aptitude and sound conceptualization of the visually impaired; *26*(2), 71.

Millard, K. A. O., & Smith, J. M. The influence of group singing therapy on the behavior of Alzheimer's Disease patients; *26*(2), 58.

Miller, L. K., & Schyb, M. Facilitation and interference by background music; *26*(1), 42.
